Lists

Here are some ways of using lists, including nesting one type within another.

1. This is a numbered list
2. This is #2 in the list

Netscape - [Your CHI 96 Paper Title]

2. This is #2 in the list

- This is a bulletted list including nested lists
- A numbered list
  1. This is a nested numbered list
  2. This is #2 in the list
  3. This is #3 in the list. This line will run long so you can see how longer lines included in lists will typically be displayed. How long should this line go on?
- A definition list

  1st Term to be defined

  1st Definition

  Ways to make lists without bullets or numbers

  You can use <BR> to end a line without adding a blank line before the next text. Or you can use a definition list without terms or without definitions.

  You could also use <PRE> as described above. For example.

```
Line one
Line two
```

- This is the last bullet in the main list

This is the typical way to end an HTML file:

Title of document / Contact author's email address
